Declares an intent to further the government-to-government relationship between the state of Washington and Indians in the state of Washington by authorizing the governor to enter into cooperative agreements concerning the sale of cigarettes.

Finds that these agreements will provide a means to promote economic development, provide needed revenues for tribal governments and Indian persons, and enhance enforcement of the state's cigarette tax law, ultimately saving the state money and reducing conflict.

Authorizes the governor to enter into cooperative agreements with the Squaxin Island Tribe, the Nisqually Tribe, Tulalip Tribes, the Muckleshoot Indian Tribe, the Quinault Nation, the Jamestown S'Klallam Indian Tribe, the Port Gamble S'Klallam Tribe, the Stillaguamish Tribe, the

Sauk-Suiattle Tribe, the Skokomish Indian Tribe, the Nooksack Indian Tribe, and the Lummi Nation.

Provides that each agreement adopted under this act shall provide that the tribal cigarette tax rate be one hundred percent of the state cigarette and state and local sales and use taxes within three years of enacting the tribal tax and shall be set no lower than eighty percent of the state cigarette and state and local sales and use taxes during the three-year phase-in period.

SB 5380-S by Senate Committee on Economic Development & Telecommunications (originally sponsored by Senators T. Sheldon, Jacobsen and Finkbeiner; by request of Utilities & Transportation Commission)

Reducing regulatory requirements on competitive telecommunications services and companies.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Directs the commission to waive the application to competitive telecommunications service of any regulatory requirement under title 80.36 RCW, except RCW 80.36.320 and 80.36.330 if it determines that competition will serve the same purposes as public interest regulation. The commission may waive different regulatory requirements for different types of service or different types of companies if the treatment is in the public interest and does not result in unfair competitive advantage.

Authorizes the commission to permit or require that telecommunications companies maintain publicly accessible price lists or file price lists with the commission.

Provides that, regardless of whether price lists are filed with the commission, no telecommunications company may impose mandatory local measured telecommunications service that is inconsistent with the provisions of RCW 80.04.130(3).

Requires each telecommunications company to notify customers of any change in the prices, terms, or conditions under which any competitive telecommunications service is offered or provided.

Requires the commission, after a process of public participation, to report to the appropriate committees of the legislature by December 1, 2001, on the following issues related to implementing this act:

(1) An update on the development of competitive telecommunications services in the Washington marketplace, including differences by geographic areas, customer classes, and types of services;

(2) A plan for providing consumers with a meaningful way to track and compare competitive telecommunications services, with emphasis on improving consumers' ability to make informed choices among alternative providers; and

(3) The standards the commission applies to determine whether different regulatory treatment authorized under this act is in the public interest and does not result in unfair competitive advantage.

Requiring new energy efficiency measures.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Finds that: (1) The economy of the state and the health, safety, and welfare of its citizens are threatened by the current energy supply and price instabilities;

(2) Many energy efficiency programs for public buildings launched during the 1970s and 1980s were not maintained during the subsequent sustained period of low energy costs and abundant supply; and

(3) Conservation programs originally established in the 1970s and 1980s can be improved or updated. New programs drawing on recently developed technologies, including demand-side energy management systems, can materially increase the efficiency of energy use by the public sector.

(2) State government must play a leading role in demonstrating updated and new energy efficiency technologies. New programs or measures made possible by

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Provides that a person may change the place of use of a water right if the water is used on land contiguous to the place of use of the water right, the land is owned or leased by the holder of the water right, and the total amount of land to which the water is applied is not increased. Before making the change, the water right holder shall consult with the department.

Does not apply to the use of water within an irrigation district or to changes in use that increase the total amount of acreage irrigated under a water right.

Declares that RCW 90.03.380 shall not be construed to prevent construction of emergency interties between public water systems to permit exchange of water during short-term emergency situations, or rotation in the use of water for bringing about a more economical use of the available supply, however, the department of health in consultation with the department of ecology shall adopt rules or develop written guidelines setting forth standards for determining when a short-term emergency exists and the circumstances in which emergency interties are permitted. The rules or guidelines shall be consistent with the procedures established in RCW 43.83B.400 through 43.83B.420.

Regarding temporary nonuse of a water right.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Provides that sufficient cause for nonuse includes:

(1) Temporarily reduced water need for irrigation use where such reduction is due to varying weather conditions including but not limited to precipitation and temperature, so long as the water user's diversion and delivery facilities are maintained in good operating condition consistent with beneficial use of the full amount of the water right. The burden is on the water user to prove that the weather conditions are significantly different from average conditions such that they resulted in the reduction of water use;

(2) Water conservation measures implemented under the Yakima river basin water enhancement project, so long as the conserved water is reallocated in accordance with the provisions of P.L. 103-434;

(3) Reliance by an irrigation water user on the transitory presence of return flows in lieu of diversion or withdrawal of water from the primary source of supply, if such return flows are measured or reliably estimated using a scientific methodology accepted as reliable by the director of the department of ecology; or
